DETAILED ACTION

Claim Status

Claims 1 – 30 have been examined.

Claims 1, 12 and 25 have been amended.

Drawings

1. New drawing for Figure 6 has been accepted.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1 – 30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The current focus of the Patent Office in regard to statutory inventions under 35 U.S.C. § 101 for method claims and claims that recite a judicial exception (software) is that the claimed invention recite a practical application. Practical application can be provided by a physical transformation or a useful, concrete and tangible result. No physical transformation is recited and additionally, the final result of the claim is the syntax based editor parsing operation of tokens while maintaining the cursor position which is not a tangible result because the result is not claimed as being in a computer readable medium such as being displayed (not just the presence of a display unit. 4. 35 U.S.C. 101 reads as follows:

Art Unit: 2193

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 28 and 29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to a signal directly or indirectly by claiming a medium and the Specification recites evidence where the computer readable medium is define as a “*wave*” (such as a carrier wave) . In that event, the claims are directed to a form of energy which at present the office feels does not fall into a category of invention. The following link on the World Wide Web is for the United States Patent And Trademark Office (USPTO) policy on 35 U.S.C. §101.

<http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf>

6. The Applicant's is claiming what amounts to a carrier wave which is currently not statutory.

Claim 28

The computer program product of claim 25, **supplied, at least in part, via a communications medium for execution on a computer coupled thereto.**

Claim 29

The computer program product of claim 25, wherein the at least one computer readable medium includes at least one of magnetic storage medium, optical storage medium, electronic storage medium, **a network medium, wireline medium, wireless medium, and other communications medium.**

The embodiments that are not currently statutory should be deleted from the claims and since they are part of the original Specification a statement that the current claimed invention is not embodied on a “wave”.

Where the display is present and not being claimed as actually being displayed the Applicant should consider claiming displaying the result to make it a tangible result. Verbs like “determining” are deemed transformations not resulting in a tangible result unless properly claimed.
